The Building Commission For Condition Of Affairs

Reported At The Ohio Tuberculosis Sanatorium

Member Of Board Of Trustees Makes Statement

And Replies To Charges Made By A Representative

And At The Same Time Raps Building Commission

(Hansfield News)

The building committee of the Ohio Tuberculosis sanatorium is blamed for the present conditions which exist there and which will no doubt result in a committee from the state legislature making an investigation.

The legislature will try to find out what is the matter with the state sanatorium for tuberculosis patients at Mt. Vernon if the resolution introduced by Representative Guard of Champlain county is adopted.

"Ever since the sanatorium was opened I have been hearing stories that lead me to believe a change in the conduct and management is necessary," said Guard. "There is something the matter up there."

If Guard's resolution is adopted, a joint senate and house committee will investigate. Guard first proposed a resolution calling for the abandonment of the institution as a sanatorium and its conversion into a women's reformatory.

At present the sanatorium has more employees than patients.

"The employees live on the fat of the land down there and the state foots the bill," said Guard. "We want to know why the legislature isn't doing more good for the common people—the ones for whom it was built."

Guard's resolution also asks if the \$350,000 sanatorium is necessary, in view of the fact that the different counties are authorized by law to construct tuberculosis sanatoriums. Several counties are doing this.

"There is no question that the building commission is responsible for the present condition at the sanatorium," said Frank E. Turner, member of the board of trustees. "Over a year ago the legislature made an appropriation for the completion and furnishing of the outside sleeping sheds, a barn and a poultry house. The sheds have not yet been completed, the barn is not yet under roof while the poultry house would not be completed were it not for the fact that the employees of the institution have been to work."

"The state building committee and not the board of trustees have control of the building operations."

"There seems to be a misunderstanding as to just what the Ohio Tuberculosis sanatorium is really is. It is not a hospital, as the patients are supposed to be only incipient cases and the institution would be seriously handicapped if any of the patients were to be stricken down with some other disease. The legislature has seen fit to appropriate the money necessary to build the sanatorium and while the counties are now authorized by the law to operate their own institutions of such a character, the state sanatorium is here and must be maintained."

SANATORIUM STATISTICS

On account of the misstatement that has gone out that there are only 24 patients at the state sanatorium, Superintendent Corwell on Thursday morning went to Gov. Sherman for his information a statement regarding people brought and the number now at the institution. It shows that there has been admitted to the sanatorium a total of 130 patients, of whom 79 were discharged, leaving the number now at 51; also that provision has been made for receiving four who are coming. Dr. Corwell also states that the present capacity of the institution is 75, and that within thirty days 112 patients can be comfortably taken care of, and the number may be increased to 144 if necessary, provided all patients are in the incipient stage of pulmonary tuberculosis, as provided by law.

NO DIVORCE

For Mrs. Stillwell In Holmes County Court

Judge Gives Reasons For Refusing The Decree

The Case Of King Vs. King Is Still Being Heard

In The Common Pleas Court Of Knox County

The Will Of Late Patrick Finnagan Is Filed

Millersburg, Ohio, March 20—Acting in the belief that a man and woman who have been united in the bonds of matrimony for forty-two years with grown up children and grandchildren have passed the period when they may be separated by a decree of law, Judge Dever of Ashland today refused to grant a divorce to Mrs. Elvira L. Stillwell from Judge Wellington Stillwell, whose case caused a sensation here earlier in the month and in which Mrs. Stillwell named a pretty stenographer in her husband's employ as one of her causes for the action.

Judge Dever's decision, filed with Clerk of Courts Carl Schiller, besides refusing a decree divides the estate in case the two aged people should not live together in the future. The documents covers eleven typewritten pages and even gives a portion of a poem the court deems applicable to the case. In ruling up the division of the property in event of the judge and his wife still refuse to live together, Judge Dever said:

"This division is not easy. The sympathy in such cases is always with the woman, yet the court must do right by considering the defendant's interests, also in the savings of his life's work."

The court then considers the wife's interests in the estate from the standpoint of death, which would give her one-third of the real estate during her life. On this basis he gives Mrs. Stillwell as her own the five Millersburg residence, free of all dower interest of her husband. She also is given one-half of a valuable lot on Main St. here. All the household furniture is appraised to the wife and she is decreed a \$2,000 mortgage, now in the name of the defendant, on a rich farm owned by the Holmes County Coal & Clay Products Co., to be used specifically in paying off a mortgage on the Millersburg home. The balance of the no inconsiderable property is decreed to Judge Stillwell and his wife is divested of all dower interest. The costs of the case are assessed against the defendant.

In speaking of the separation which it seems inevitably will continue, Judge Dever in his decision concludes:

For woe and experience tell us That man grows old and woman jealous. Both would their little ends secure; He sighs for freedom—she for power.

His wishes rest abroad to roam, And hers to dominate the home.

Flanagan Will

The last will and testament of Patrick Flanagan, late of Mt. Vernon, has been filed in probate. By the terms of the will the testator gives to his wife during the lifetime the house and lot on West Walnut street and after her death the property goes to his two daughters, Elizabeth Flanagan and Mrs. Kate O'Rourke. To his daughter, Mary, he gives \$25, to his son, William \$25 and to his daughter, Mrs. Julia Toy, \$25. Elizabeth Flanagan and Mrs. Kate O'Rourke are named as co-executors of the will, which was signed October 8, 1907, in the presence of L. W. Williams and Penelope Brecker.

WEATHER

Is Good For The Fruit Says An Expert

(Weather News)

Cheer up! Cheer up! This kind of weather may be unpleasant to most of us, but it is not altogether inappropriate. It's good for Wayne county fruit. W. J. Green, horticulturist at the Experiment Station said so Wednesday. The weather this week has not been cold enough to do any damage, and it is keeping the fruit back to some extent. This will probably prove beneficial for it will protect the fruit from late frosts, to come it you will a week or so later," Mr. Green said. So there you are. If this weather is unsuitable to you, just sit back and give the weather-man the laugh. Think of the fine juicy apples and peaches and plums you will be eating next fall, all because of the present weather conditions.

Fruit according to Mr. Green, is in very good shape. The cold weather two weeks ago did some damage to peaches in the southern part of the state, but had no harmful effect up here in Wayne county.

Modern Winklers at Sea—The term "sea of a sea cow" is no longer a title of reproach. The highly paid specialist who presides over the winklers is a chef with an intense local reputation. The menu of the end of the banquet was unique given to indication that the ship has not been supplied from land. Immense stores of fresh meats, vegetables, fruits and even flowers must be carried. The winklers are incredibly clean, with their rick down, glass bottles and sea water, as are also the cold storage rooms. To save a hitch in order is a the more efficient provision of sea food on land—Charles's Magazine.

EMPIRE STATE CAPITOL BURNS

Rare Records and Documents Go Up In Smoke

ESTIMATE LOSS AT \$7,000,000

Four Hundred Thousand Volumes In State Library Destroyed—Senate and Assembly Chambers Waterlogged—One of Harshest Bldgs In Country, Erected At Cost Of \$20,000,000. Burned Utterly by Fire Starting From Electric Wire.

Albany, N. Y., March 20—Loss of records and documents almost priceless in value and a suspension of state business, is the net result of a \$7,000,000 fire which started in the assembly library of the state capital building and spread through the western portion of the building, destroying everything in its path from the third floor upward. A defective electric light wire is said to have caused the fire.

The state library, containing 400,000 volumes, was entirely destroyed, as well as a number of offices surrounding it. The other portions of the building including the senate and assembly chamber, are waterlogged. It is thought that one life has been lost. Samuel Albert, a night watchman, is missing and it is feared that he succumbed to the flames.

State Library Destroyed—The fire completely destroyed the state library, the administration office of the state department of education, the state court of chancery, the court clerk's office, the senate finance committee room, the office of the chairman of the finance committee, the office of the president pro tem of the senate, the assembly library, the assembly document and wrapping room. All the offices in the western portion of the building on the first and second floors are flooded with water. The other portions of the building are also covered with several inches of water. The grand western staircase was blackened with smoke. The assembly chamber furnishings are ruined by water and the oak ceiling crumpled away in several places.

The building was completed several years ago at a cost of \$20,000,000 to the state.

It is hardly yet so much the great loss of our treasure as the loss of our spirit that makes us weep.
